- 1 Although the AC software can be run in virtualised environments, Asset Control is not yet able to provide technical support for performance related problems in a virtualised environment. If you do choose to run in a VM, please ensure that you choose a VM with good IO throughput.
- 2 For the x86_64 and Sun SPARC 64 processors some AC Server utilities still require 32-bit C libraries. These utilities are not the core AC Server processes.
- 3 Limited support - only high priority production issues
- 4 Expected to be supported as of July 2020
- 5 MS SQL is only supported for RHEL and SUSE and not for Solaris.
- 6 UTF-8 is only supported in combination with Oracle and not with Sybase and MS SQL.
- 7 Lists the supported database *server* versions. See the AC Server documentation for required database *client* versions such as Sybase OCS and Oracle Client.

- 1 Support for OpenJDK is expected July 2020. Other JVMs such as IBM are not supported.
- 2 Some Server side applications are delivered with a module in the AC Desktop to retrieve data or configure the application.
- 3 As of AC Server 7.3 Audit Trail is embedded in the AC Server. If required, the AC Audit Trail component can still be run on AC Server 7.
- 4 Limited support - only high priority production issues
- 5 Expected to be supported as of July 2020
- 6 Requires AC Server 6.3.27 or higher
- 7 Requires AC Connect 2.6.7 or higher

| AC Plus Realtime Gateways | | | AC Server | | | Operating Systems | | | | | System Architectures | | | Process Monitor | | |
